

Q: Can I search the Comment field?

Comment Search in Presto

The Comment Search feature in Presto is standard -- no Special Script keyword needed. Simply open the Vectors window and pull down the Vectors drawer under the word "Vectors" on the command bar. Use partial words if you like.

The comment field is also used in different ways for other Presto functions. During mixed signal testing, it is used to program DACs and perform analog measurements with the MX board. And there is also a mode for the pattern generator to symbolically generate programs.

More about the Comment field can be found in the User Manual, Section 9.
